DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to methods of acquiring tolerance to a foreign DNA or methods of sustaining gene effect comprising introducing foreign DNA to thymus.

Group II, claim(s) 13-19, drawn to non-human animals that have acquired tolerance to a foreign DNA.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: neither the foreign DNA itself nor transduced fetal T lymphocytes represent a "special technical feature" since heterologous DNA and vectors including heterologous DNA, and transduced fetal thymocytes were well known at the time of filing. Furthermore, the tolerant non-human animal of Group II can be made without using

transduced T lymphocytes or foreign DNA, i.e. by intrathymic injection of foreign protein into fetal thymus. In addition, the inventions of Group I and II are separately patentable in that the non-human animals of Group II are substantially different in structure, physical, and biological properties than the foreign DNA or fetal T lymphocytes used in the methods of Group I, and that the non-human animals can be used for purposes unrelated to the methods of Group I, i.e. the use of the non-human animals for isolating cells or tissue, or the use of the animals as recipients for organ or tissue transplants.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
